

No. 1(11)/2019-SP-I  
Government of India  
Ministry of Consumer Affairs, Food & Public Distribution  
Department of Food & Public Distribution

Krishi Bhawan, New Delhi  
Dated the 13 August, 2020

To

Principal Secretaries (Sugar/Sugarcane Development)  
[of all sugar producing States]

**Subject:** Diversion of excess sugarcane and sugar - a long term solution for addressing the problem of excess stock.

Sir/Madam,

As you are aware, due to surplus production of sugar, there is excess availability of sugar in the country which has been continuously depressing the ex-mill price of sugar. This has adversely affected the realization on sale of sugar, thereby affecting liquidity of sugar mills, resulting in accumulation of cane price arrears of farmers.

2. With a view to improve liquidity position of sugar mills to enable them to clear cane price dues of farmers, the Government has taken various measures in sugar seasons 2017-18, 2018-19 and current sugar season 2019-20; namely, assistance to sugar mills to facilitate export of sugar; extending buffer subsidy; extending assistance for defraying expenditure towards internal transport, freight, handling and other charges on export of sugar; extending soft loans to sugar mills through banks; extending interest subvention to sugar mills for augmentation of ethanol production capacity, etc.

3. Though the Government has taken various measures for sugar sector, but going forward, the diversion of excess sugarcane and sugar is the long-term solution for addressing the problem of excess stock. As you are aware, that ethanol is a green fuel & its blending with petrol saves country's foreign exchange, therefore, with a view to encourage sugar mills to divert excess sugarcane to produce ethanol for blending with petrol, the Government has also allowed production of ethanol from B-Heavy Molasses, sugarcane juice, sugar syrup and sugar; and has also fixed the remunerative ex-mill price of ethanol derived from C-heavy molasses @ Rs. 43.75/litre; from B-heavy molasses @ Rs. 54.27/ litre and @ Rs. 59.48/litre for ethanol derived from sugarcane juice/ sugar/ sugar syrup for ethanol season 2019-20 (December-November).

4. Further, with a view to support sugar sector and to encourage sugar mills to divert excess sugarcane to produce ethanol in the interest of sugarcane farmers and sugar industry, soft loans of about Rs.18,600 crores are being extended through banks to 362 projects (349 sugar mills and 13 molasses-based standalone distilleries) for enhancement and augmentation of ethanol production capacity, for which an interest subvention of about Rs.4045 crore for five years is being borne by the Government. Out of 349 sugar mills that have been granted in-

principle approval by DFPD, so far, loans have been sanctioned to 64 project proponents & completion of these projects would increase ethanol distillation capacity by 165 cr ltrs..

5. The Government has fixed 10% blending target for mixing ethanol with petrol by the year 2022 and 20% blending target by 2030. During last ethanol supply year 2018-19, about 180 cr ltrs of ethanol was supplied by sugar mills to OMCs, thereby achieving 5% blending target. There is enough demand of ethanol by OMCs; and as remunerative prices of ethanol are being fixed by Government, therefore, sugar mills may not have any problem in diversion of excess sugarcane & mills can supply more ethanol produced from B-Heavy molasses & sugarcane juice/ sugar syrup, apart from ethanol produced from C-heavy molasses. It may also be kept in mind that, the revenue from production and supply of ethanol to OMCs is realised by mills / distilleries within 3 weeks of supply; whereas, revenue from sale of sugar produced is realised in 12-15 months. Thus, diverting sugarcane to ethanol would improve cash flows of sugar mills and would facilitate them to make timely payment of cane dues of farmers.

6. The State Governments/ UT Administrations are therefore, requested to encourage sugar mills and distilleries in their State to divert excess sugarcane to produce fuel-grade ethanol. At present, even the installed capacity for production of ethanol has not been fully utilized by the sugar mills/distilleries. Sugar mills/ distilleries should be advised to utilize at least 85% of their existing capacity to produce ethanol. Sugar mills having distillation capacity should divert B-heavy molasses and sugar syrup for producing ethanol to utilize their capacity to maximum extent. Those sugar mills which do not have distillation capacity should produce B-Heavy molasses and should tie-up with distilleries which can produce ethanol from B-Heavy molasses. Steps should also be taken by States/ UTs to ensure smooth movement of molasses and ethanol.

7. State Governments are requested to hold meetings with millers and distillers to encourage them to divert excess sugarcane to produce ethanol and monitor the progress from time to time; DFPD may also be invited to participate in the meeting. State-wise estimated Ethanol manufacturing capacity of molasses based distilleries in India, along with ethanol supply target for the distilleries at 85% of their installed capacity is enclosed herewith.

Yours faithfully,

(Subodh Kumar Singh)

Joint Secretary to the Government of India  
Ph-2338 2512

Copy to:

- i. Cane Commissioners / Director (Sugar) of all sugar producing States
- ii. CEO/MD of all sugar mills.
- iii. ISMA / NFCSF / SISMA / AIDA

**State-wise estimated ethanol producing capacity with the molasses based distilleries during 2019-20 and target for ethanol production during ethanol year 2020-21**
